Response from Chiron neutral..Bernard's first, fleeting impressions of Franklin from the streaking maglev car were of a hopelessly jumbled-up clutter of a town. Unlike the neat and orderly models of urban planning that had replaced the heaps of American rubble during the recovery after the Lean Years--with business, entertainment, industrial, and residential sectors segregated by green belts and tidy landscaping--everything in Franklin seemed to be intermingled with no discernible rhyme or reason. Buildings, towers, houses, and unidentifiable constructions of all shapes, sizes, and colors were packed together, overlapping and fusing in some places while giving way to clumps of greenery and trees in others. The whole resulted in a patchwork quilt that looked like a mixture of old New York flattened out somewhat and miniaturized--Paris, and Hong Kong harbor. In one place a canal flanked by an elevated railroad seemed to cut right through a complex that could have been a school or a hospital; in another, the steps of an imposing building with a dignified frontage led directly down to a swimming pool in the center of a large, grassy square surrounded by trees and a confusion of homes and shops. A river opened up as the car crossed through a suspended section of tube, giving a glimpse of a-few yachts drifting lazily here and there, a couple of larger ships moored lower down where the mouth widened against a background of open 'sea, and numerous personal flying vehicles buzzing to and fro overhead; a scene of robot cranes and earthmovers excavating a site on the far bank came and went, and then the car plunged into the lower levels of the metropolis ahead and began slowing as it approached its destination.. "I trust we'll all stay friends and keep in touch," Eve said..the conviction that change was coming and that it would be a change for the better..But you hardly even talked about it. Hell, I know I'm twenty years older too, but at least I haven't forgotten all the things we used to talk about. "And from Engineering there's a, . . Merrick--Leighton Merrick, that's right." She looked at Nanook. "And one called Walters,."Bonus points," said Leilani. "Your dad must be great..which is probably something more psychologically complex, as before.. "We're still the some people," Jay said from the end of the sofa, looking at his mother. "That's not going to change. If you're going to act dumb, you can do that anywhere." To Bernard's mild surprise Jay had shown a lively interest in the conversation all through dinner and had elected to sit in afterward. About time too, Bernard thought to himself.. "So who did your stepfather kill?" she asked nevertheless, playing Leilani's curious game if for no reason.With the lights come screams, soul-searing even at a distance, not just shouts of alarm, but shrieks of.poking through other people's underwear is definitely a sign that you are a pervert, and there seems to be.sound..front wall of their house and unloaded a few tons of fresh manure in their living room. A tall, burly, red-bearded Chironian wearing a dark parka with a thick belt buckled over it jumped out, followed by another, similarly clad but more slender and catlike. More figures became visible inside when the cabin light came on. Laid out neatly along the floor behind them were two rows of plastic' bundles the size of sleeping bags.. "We all have to pay our debts," Nanook said unhelpfully..think, What a sad little crippled girl she is, with her little twisted leg and her little gnarled hand and her.EVEN IN HIS short time at the university near Franklin, Jerry Pernak had learned that Chironian theoretical and experimental physics had departed significantly from the mainstream being pursued on Earth. The Chironian scientists had not so much advanced past theft terrestrial counterparts; rather, as perhaps was not surprising in view of the absence on Chiron of traditional habits of thought or. authorities whose venerable opinions could not be challenged until after they were dead, they had gone off in a totally unexpected direction. And some of the things they had stumbled across on the theft way had left Pernak astounded.. "Aha!" The preacher made an appealing gesture to the audience. "Is there any difference, my friends? Can we see atoms? Is this not arrogant insolence?" He looked back at the boy and jabbed an accusing finger at him. 'Do you claim to have seen atoms? Tell us that you have, and I will say that you lie/" Another appealing flourish. "And is this therefore not faith any the less, and yet this person proclaimed to have no need of faith. Does he not, therefore, contradict himself before us?". "When you've got enough to eat and drink, then you worry about keeping warm. And when you're warm enough, you start thinking about staying safe." Colman opened his hands briefly. "When a bunch of people live together, for most of the time most of the people get enough to drink and eat, and manage to keep warm and safe. What do you think they start worrying about then?". "You don't have to live with it, Mother," Adam told her. Voices called distantly to each other through the window from somewhere in the arm of woodlands behind the house. Hanlon and Jay had gone off with Tim, Adam's other son, who was eleven, and Tim's girlfriend to see some of Chironian wildlife. Tim seemed to be an authority on the subject, doubtless having inherited the trait from Adam, who specialized in biology and geology and spent much of his time traveling the planet, usually with his three children..Of course, that vehicle hadn't been unique. He would explain everything to Jean later, he decided..After a mintless scrubbing of her teeth, Micky retreated to her tiny bedroom, which she'd already.Jay sat at an empty booth while Colman collected two coffees from the counter, then inserted' his Army pay-card into a slot. In a lot of ways lay reminded Colman of himself when he was a lot younger. Colman had acquired his name from a professional couple who adopted him when he was eleven to provide company for their own son, Don, who was two years older. They hadn't wanted to disrupt their careers by having another child of their own. Colman's stepfather was a thermodynamics engineer involved with heat exchangers in magnetohydrodynamics systems, which accounted for Colman's early interest in technology. Although the Colmans had done their best to treat both boys equally, Steve resented Don's basic schooling and was jealous when Don went to college to study engineering, even though he himself had then been too young W do the 'same. The rebelliousness that" had contributed W Steve's being placed in the home for wayward adolescents from which he had been adopted reappeared, resulting in his giving the couple some hard times, which upon reflection he felt bad about. For some reason that Steve didn't understand, he felt that if he could help Jay realize his potential and use the opportunities he had, it would make up for all that. Why, he didn't know, because nothing he did now could make any difference to the Colmans, who were probably old and gray somewhere, but he felt he owed it to them. People's minds worked like that. Minds could be very strange..We-we never believed that story," Bernard said weakly..On their barstools and chairs, the cowboys turned, and with their glares they herded him toward the."Do you? Or is it that you are unable, yet, to accept it?" Celia forced as much coldness into her voice as she could muster. "I don't like being told that I'm interested in protecting my own skin."
